Participating Pre-Doctoral Graduate Programs

Eligibility
Pre-doctoral students from participating graduate programs in their 2nd & 3rd years of graduate training at the time of appointment conducting biomedically-relevant biophysics research are eligible. Appointment will provide stipend, tuition, and some funds for yearly travel to a scientific meeting.

Curricular Requirements
In addition to completing the requirements of their parent graduate program, trainees must take three core courses in Biophysics, an ethics course, a rigor & reproducibility course, a structural biology workshop, and an elective. These requirements are mandatory; no exceptions will be made.

Core Courses:
1. Choose either IBiS Molecular Biophysics (IBiS 401; Sp20) or DGP Structural Basis of Signal Transduction (DGP 466; W20)
2. Biophysical Methods (IBiS 409; F19)
3. Quantitative Biology (IBiS 410; F19)

Ethics Course:
Choose one of: Ethics in Biological Research (IBiS 423; F19), Colloquium on Integrity in Biomedical Research (DGP 494; F19), Responsible Conduct of Research Training (GEN ENG 519; F19, W20, Sp20)

Elective Courses:
Visit the website [http://www.biophysics.northwestern.edu/](http://www.biophysics.northwestern.edu/) for the list of approved elective courses.

Rigor & Reproducibility course (IBiS 421; Su19)

Structural Biology Workshop: 3-day summer workshop covering NMR, crystallography, & cryoEM (Su19)

Program Activities
Molecular Biophysics Club – Monthly, Third Wednesdays, Noon, Cook 3118
Presentations by a graduate student or post-doc from participating preceptor labs

Evanston Molecular Biophysics Journal Club – Monthly, Fourth Tuesdays, Noon, Cook 3118A;

Chicago Incomplete Factorial Structure Function Journal Club – Monthly meetings
Student-run journal clubs with presentations by participating preceptor lab members

Molecular Biophysics Seminar Series – Monthly, First Thursdays, 12:30 PM, Pancoe Auditorium
Distinguished non-NU speakers hosted by preceptors followed by lunchtime meetings with speaker

Biophysics Trainee Meetings – Monthly, Second Tuesdays, 12:30 PM, Pancoe 4103
Trainee meetings with the Steering Committee and Mentors describing their research progress

Annual Biophysics Symposium – Second Fridays in September, 9 AM-5 PM, Pancoe Auditorium

Trainee Nomination, Selection, & Expectations
Students are nominated by preceptors over the summer each year. Nominations are evaluated by an ad hoc committee comprising program preceptors. Presently, 8 to 9 trainees are appointed each year.

Specific Expectations of Supported Trainees; Trainees must -
• Complete curricular requirements and remain in good academic standing
• Participate in the training program-sponsored activities listed above, present poster at Biophysics Symposium every year and give a talk at least once at the Biophysics Club or the Biophysics Symposium during their tenure at Northwestern
• Present oral research updates (twice a year) at Biophysics Trainee Meetings
• Provide yearly written research reports documenting progress
• Provide career plans or updates to career plans (aka Individual Development Plans or IDPs) every year
